

Good afternoon, I know this is a very late request for the permit of application for servicing food during a fundraising event. The Road Island Student Lions Club is a volunteer organization that is providing food during the annual Touch a Truck Event. Although the Portsmouth Lions club has done this event in years past, we are the last line for a very late request in servicing the needs of the public. I understand this is past due for asking for the script, but I would like to emphasize the important role we play in servicing the community at large. As students we are energetic and capable hardworking individuals, we are trying to pull strings to aid those who are requesting our help during the same week many of us are preparing for finals. I wish things could be less chaotic and it wasn't this last minute for any of us, but we are willing and able to pursue service when called upon.

It would mean the world to us if you could pass this certificate of approval through, we would love to continue service and outreach programs, with your support and encouragement I believe we have the power to aid the communities around us. So, thank you for your efforts to aid us during our service to the Middletown Community, many of us are not even from the area but we are excited to work with you and service the families by providing them with an affordable and enjoyable lunch. Considering we are a 100% Non Profit Volunteer organization and that we are entirely student led, I would further ask that the Victualler fee of \$100 be waved so we continue to service those in need. Thanks for your partnership, we really appreciate your support.

Sincerely Jon Walker, and the RI Student Lions Club board of Members
