RE: Road Surface Rating (RSR) Presentation

Rich,

On August 13, 2019 the Council approved BETA Engineering to re-assess our Road Surface Rating (RSR) and update our pavement management program. BETA has completed the RSR inspection along with updating our pavement management program. I would like to have Tony Garro from BETA give a presentation to the Council on the information that was collected.

We will be working with BETA to complete our 3 year paving plan that I will present to the council at a future meeting.

Respectfully submitted,

Brian Woodhead
Director of Public Works
