Physical distancing and organizing personnel and event/venue layout

Please explain the venue/area where your event will occur. For large or complex venues/event layouts, please note individual spaces within the venue/area (if applicable). Please use the table below to list each space within the venue/area, its size, its capacity limit, and the number of attendees expected. Capacity limits can be calculated using 1 person per 100 square feet for unstructured settings or areas of general circulation. Capacity of seated or structured areas is determined by the ability to maintain 6-foot spacing between parties (or up to 66 percent of normal seating capacity, if applicable). Please note that the 6-foot distancing requirement may be more restrictive than the 66 percent rule; the 6-foot spacing requirement therefore should be considered first as you begin planning for reopening.

Brief Description of Space within the Overall Venue/Area (e.g. ballroom A)	Indoor/Outdoor Space	Size of Space (e.g. in square feet)	Capacity of Space (in compliance with COVID guidelines)	Number of Attendees Expected

Entrance process, capacity and crowd control. Please use the checklist below to explain how you will ensure that the above capacity limits are maintained and the processes you will use for maintaining physical distance while entering the event area. Examples of best practices include issuing timed tickets or reservations, allowing entrance in shifts, and maintaining physically distanced lines.

- Designating staff to monitor for capacity at key spaces (e.g. entrances and exits)
- Modifying advertising practices (e.g. limiting advertising); Requiring reservations in advance
- Issuing tickets for designated time blocks
- Implementing measures (e.g. signage and 6-foot physical distancing demarcations) to allow queues to form outside of entrance(s)
- Conducting event rehearsal/walk-through to identify unanticipated bottlenecks or high-traffic areas
- Modifying hours as follows: _____

REOPENING RI
