I think we should hear all comments from Island residents. Making a decision on any of the 4 National Grid proposals/options is putting the cart before the horse. Much more information should be known about National Grid's proposals before the town supports any of their proposals.

Does the town really think National Grid is going to truly listen to Aquidneck Island ratepayers when they're also beholden to their shareholders in terms of future investments? I imagine National Grid's "self-established" December 1st "deadline" is fluid. Their "deadline" was not established by any state regulatory body.

If the town council is opposed to old mill lane - why is the town allowing for a blatant violation of the towns zoning law ?

jennifer 08:03 PM

Why don't you draft 4 different versions of the letter you may want to submit?
