

The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island

**Governmental Accounting Standards Board
(GASB) Statements No. 67 and 68
Accounting Valuation Report
as of June 30, 2019**

This report has been prepared at the request of the Town of Portsmouth, RI to assist the Town in preparing their financial report for their liabilities associated with The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island. This valuation report may not otherwise be copied or reproduced in any form without the consent of the Town of Portsmouth, RI and may only be provided to other parties in its entirety. The measurements shown in this actuarial valuation may not be applicable for other purposes.

November 27, 2019

Ms. Lisa Mills, Finance Director
Town of Portsmouth, Rhode Island
2200 East Main Road
Portsmouth, RI 02871

Dear Ms. Mills:

We are pleased to submit this Governmental Accounting Standards Board (GASB) Statements No. 67 and 68 Accounting Valuation as of June 30, 2019 for The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island, a defined benefit pension plan. It contains the actuarial information that will need to be disclosed in order to comply with GASB 67 and 68. Except as otherwise noted, please refer to The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island Actuarial Valuation Report as of July 1, 2019, dated November 27, 2019, for the data, assumptions and plan of benefits underlying these calculations.

This report was prepared in accordance with generally accepted actuarial principles and practices at the request of the Town to assist the Town in preparing their financial report for their liabilities associated with The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island. The census and financial information on which our calculations were based were provided by the staff of the Town of Portsmouth, Rhode Island. That assistance is gratefully acknowledged.

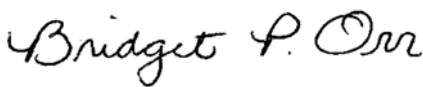

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and changes in plan provisions or applicable law.

The actuarial calculations were completed under my supervision. I am a member of the American Academy of Actuaries and I meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of my knowledge, the information supplied in the actuarial valuation is complete and accurate. Further, in my opinion, the assumptions as approved by the Town are reasonably related to the experience of and expectations for the Plan.

I look forward to reviewing this report with you and to answering any questions.

Sincerely,

Segal Consulting, a Member of The Segal Group, Inc.

Section 1: Actuarial Valuation Summary

Purpose

This report has been prepared by Segal Consulting to present certain disclosure information required by Governmental Accounting Standards Board (GASB) Statements No. 67 and 68 as of June 30, 2019. This report is based on The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island Actuarial Valuation and Review as of July 1, 2019, dated November 27, 2019, which reflects:

- The benefit provisions of The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island, as administered by the Town;
- The characteristics of covered active employees, inactive employees, and retired employees and beneficiaries as of June 30, 2019;
- The assets of the Plan as of June 30, 2019;
- Economic assumptions regarding future salary increases and investment earnings; and
- Other actuarial assumptions, regarding employee terminations, retirement, death, etc.

Significant Issues

The following key findings were the result of this actuarial valuation:

- The Net Pension Liability (NPL) is equal to the difference between the Total Pension Liability (TPL) and the Plan's Fiduciary Net Position. The Plan Fiduciary Net Position is equal to the market value of assets and therefore, the NPL measure is very similar to an Unfunded Actuarial Accrued Liability (UAAL) on a market value basis. The NPL increased from \$41.4 million as of June 30, 2018 to \$46.6 million as of June 30, 2019 and the Plan's Fiduciary Net Position as a percent of the TPL decreased from 57.83% to 55.15%.
- The NPL measured as of June 30, 2019 and June 30, 2018 was determined based upon the results of the actuarial valuations as of July 1, 2019 and July 1, 2018, respectively.
- The discount rate used to measure the TPL and NPL as of June 30, 2019 and June 30, 2018 was 6.75%.

Important Information about Actuarial Valuations

In order to prepare an actuarial valuation, Segal Consulting (“Segal”) relies on a number of input items. These include:

Plan of Benefits:	Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan description in this report (as well as the plan summary included in our funding valuation report) to confirm that Segal has correctly interpreted the plan of benefits.
Employee Data:	An actuarial valuation for a plan is based on data provided to the actuary by the Town of Portsmouth, Rhode Island. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
Assets:	The valuation is based on the market value of assets as of the valuation date, as provided by the Town of Portsmouth, Rhode Island. The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island uses an “actuarial value of assets” that differs from market value to gradually reflect year-to-year changes in the market value of assets in determining the contribution requirements.
Actuarial Assumptions:	In preparing an actuarial valuation, Segal projects the benefits to be paid to existing plan employees for the rest of their lives and the lives of their beneficiaries. This projection requires actuarial assumptions as to the probability of death, disability, withdrawal, and retirement of each employee for each year. In addition, the benefits projected to be paid for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments. The projected benefits are then discounted to a present value, based on the assumed rate of return that is expected to be achieved on the plan’s assets. There is a reasonable range for each assumption used in the projection and the results may vary materially based on which assumptions are selected. It is important for any user of an actuarial valuation to understand this concept. Actuarial assumptions are periodically reviewed to ensure that future valuations reflect emerging plan experience. While future changes in actuarial assumptions may have a significant impact on the reported results, that does not mean that the previous assumptions were unreasonable.

The user of Segal's actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The valuation is prepared at the request of the Town of Portsmouth, Rhode Island to assist the Town in preparing items related to the pension plan in their financial reports. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement of the plan's assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.
- Sections of this report may include actuarial results that are not rounded, but that does not imply precision.
- If the Town of Portsmouth, Rhode Island is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.
- Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. The Town of Portsmouth, Rhode Island should look to their other advisors for expertise in these areas.

As Segal Consulting has no discretionary authority with respect to the management or assets of The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island, it is not a fiduciary in its capacity as actuaries and consultants with respect to The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island.

Section 2: GASB Information

Exhibit 1 – Net Pension Liability

	June 30, 2019	June 30, 2018
Components of the Net Pension Liability		
Total Pension Liability	\$103,976,616	\$98,072,246
Plan Fiduciary Net Position	57,341,324	56,716,068
Net Pension Liability	46,635,292	41,356,178
Plan Fiduciary Net Position as a percentage of the Total Pension Liability*	55.15%	57.83%

* These funded percentages are not necessarily appropriate for assessing the sufficiency of Plan assets to cover the estimated cost of settling the Plan's benefit obligation or the need for or the amount of future contributions.

Actuarial assumptions. The total pension liability as of June 30, 2019 was measured by an actuarial valuation as of June 30, 2019, using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation:	2.75%
Salary Increases:	3.50% per year
Net Investment Return:	6.75%, net of pension plan investment expense, including inflation
Cost of Living Adjustment:	Cost-of-living increases for pensioners whose COLAs were based on 50% of the percentage salary increase received the previous July 1 by the active bargaining unit from which the employee retired or whose COLAs were based on the annual CPI adjustment are assumed to be 2% annually. Cost-of-living increases for all other pensioners were provided by the Town.
Mortality Rates:	<p><i>Pre-Retirement:</i> RP-2006 White Collar Employee Mortality Table projected generationally using Scale MP-2019 (previously, RP-2006 Employee Mortality Table projected generationally using Scale SSA-2014 2D)</p> <p><i>Healthy Retiree:</i> RP-2006 White Collar Healthy Annuitant Mortality Table projected generationally using Scale MP-2019 (previously, RP-2006 Healthy Annuitant Mortality Table projected generationally using Scale SSA-2014 2D)</p> <p><i>Disabled Retiree:</i> RP-2006 White Collar Healthy Annuitant Mortality Table set forward 5 years and projected generationally using Scale MP-2019 (previously, RP-2006 Healthy Annuitant Mortality Table set forward 5 years and projected generationally using Scale SSA-2014 2D)</p>

Target Asset Allocation

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage, adding expected inflation and subtracting expected investment expenses and a risk margin. The target allocation (approved by the Town) and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate of return assumption are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Domestic equity	37.70%	6.16%
International developed markets equity	13.00%	6.69%
International emerging markets equity	9.10%	9.47%
Core fixed income	28.00%	1.89%
High-yield fixed income	7.00%	4.00%
Real estate	<u>5.20%</u>	4.58%
Total	100.00%	

Note: Some asset classes included in the pension plan's target asset allocation have been combined.

Discount rate. The discount rate used to measure the Total Pension Liability (TPL) was 6.75% as of June 30, 2019 and June 30, 2018. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the actuarially determined contribution rates. For this purpose, only employer contributions that are intended to fund benefits for current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs for future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, the Plan Fiduciary Net Position (FNP) was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the TPL as of both June 30, 2019 and June 30, 2018.

Discount Rate Sensitivity

Sensitivity of the Net Pension Liability to changes in the discount rate. The following presents the Net Pension Liability (NPL) of The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island as of June 30, 2019 calculated using the discount rate of 6.75%, as well as what The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island’s NPL would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1-percentage-point higher (7.75%) than the current rate.

Net Pension Liability	1% Decrease (5.75%)	Current Discount Rate (6.75%)	1% Increase (7.75%)
The Retirement Plan for Employees of the Town of Portsmouth, Rhode Island’s net pension liability as of June 30, 2019	\$61,091,198	\$46,635,292	\$34,910,592

Exhibit 2 – Schedule of Changes in Net Pension Liability – Last Two Fiscal Years

	June 30, 2019	June 30, 2018
Total Pension Liability		
Service cost	\$1,153,715	\$1,354,501
Interest	6,507,380	6,194,141
Change of benefit terms	0	-15,093
Differences between expected and actual experience	1,525,148	1,978,473
Changes of assumptions	2,358,787	487,587
Benefit payments, including refunds of member contributions	<u>-5,640,660</u>	<u>-4,675,839</u>
Net change in Total Pension Liability	\$5,904,370	\$5,323,770
Total Pension Liability – beginning	<u>98,072,246</u>	<u>92,748,476</u>
Total Pension Liability – ending	\$103,976,616	\$98,072,246
Plan Fiduciary Net Position		
Contributions – employer	\$4,324,436	\$4,322,591
Contributions – employee	271,175	301,399

Benefit payments	<u>-5,640,660</u>	<u>-4,675,839</u>
Administrative expense	<u>-36,000</u>	<u>-46,104</u>
Net change in Plan Fiduciary Net Position	\$625,256	\$3,799,788
Plan Fiduciary Net Position – beginning	<u>56,716,068</u>	<u>52,916,280</u>
Plan Fiduciary Net Position – ending	\$57,341,324	\$56,716,068
Net Pension Liability – ending	\$46,635,292	\$41,356,178
Plan Fiduciary Net Position as a percentage of the Total Pension Liability	55.15%	57.83%
Covered employee payroll ¹	\$7,750,088	\$7,820,129
Plan Net Pension Liability as percentage of covered employee payroll	601.74%	528.84%

¹ Covered employee payroll for 2019 and 2018 as estimated in the July 1, 2019 and July 1, 2018 funding valuation reports, respectively.

Notes to Schedule:

Changes in Actuarial Assumptions:	Effective July 1, 2018: <ul style="list-style-type: none">• The retirement rate for employees of the Police department with 20 years of service was increased from 35% to 50%. Effective July 1, 2019: <ul style="list-style-type: none">• The retirement rate for employees with 20 years of service was increased from 50% to 60% for employees of the Police department and from 30% to 60% for employees of the Fire department.• For healthy and disabled employees, the mortality tables were changed from the RP-2006 Employee and Healthy Annuitant Mortality Tables to the RP-2006 White Collar Employee and Healthy Annuitant Mortality Tables, and the projection scale for future mortality improvement applied to the mortality tables was updated from the SSA-2014 2D scale to the MP-2019 scale.
Changes in Plan Provisions:	Effective July 1, 2018: <ul style="list-style-type: none">• For Public Works employees, the early retirement benefit was eliminated.• A Fire Deputy who retires on or after July 1, 2017 will receive a COLA of 1.7% commencing on the January 1st following the fifth year of retirement (previously, 3.0%). Effective July 1, 2019: <ul style="list-style-type: none">• None.

Exhibit 3 – Schedule of Contributions – Last Six Fiscal Years

Year Ended June 30	Actuarially Determined Contributions ¹	Contributions in Relation to the Actuarially Determined Contributions	Contribution Deficiency / (Excess)	Covered- Employee Payroll	Contributions as a Percentage of Covered Employee Payroll
2014	\$3,677,200	\$2,792,576	\$884,624	\$7,837,400	35.63%
2015	3,948,654	4,054,721	-106,067	7,969,261	50.88%
2016	3,623,290	3,623,290	0	8,073,529	44.88%
2017	3,955,207	3,955,207	0	8,356,102	47.33%
2018	4,322,591	4,322,591	0	7,820,129	55.28%
2019	4,324,436	4,324,436	0	7,750,088	55.80%

Notes to Schedule:

Valuation date:	Actuarial Determined Contribution for 2019 was determined with the July 1, 2017 actuarial valuation.
Actuarial cost method:	Entry Age Normal Cost Method
Amortization method:	Level dollar closed
Remaining amortization period:	23 years from July 1, 2017
Asset valuation method:	Market value of assets as reported by the Town less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual and expected return on a market value basis, and is recognized over a five-year period, further adjusted, if necessary, to be within 20% of the market value.
Actuarial assumptions:	
• Investment rate of return	6.75%
• Discount rate	6.75%
• Inflation rate	2.75%
• Projected salary increases	3.5% per year
• Cost of living adjustments	Cost-of-living increases for pensioners whose COLAs were based on 50% of the percentage salary increase received the previous July 1 by the active bargaining unit from which the employee retired or whose COLAs were based on the annual CPI adjustment are assumed to be 2% annually. Cost-of-living increases for all other pensioners were provided by the Town.

¹ Based on results of the actuarial valuation as of prior July 1 (including assumptions and methods) which determined budgeted appropriation for the following fiscal year.

Plan membership:

• Retired employees and beneficiaries receiving benefits	169
• Inactive employees entitled to a return of their employee contributions	0
• Inactive employees with a vested right to a deferred or immediate benefit	8
• Active employees	<u>151</u>
• Total	328

2022	1,322,255	-65,838
2023	417,109	0
Thereafter	0	0

¹ Calculated in accordance with Paragraphs 54 and 55 of GASB 68.

APPENDIX – GLOSSARY OF TERMS

Definitions of certain terms *as they are used in Statement 68*. The terms may have different meanings in other contexts.

Active Employees:	Individuals employed at the end of the reporting or measurement period, as applicable.
Actual Contributions:	Cash contributions recognized as additions to a pension Plan Fiduciary Net Position.
Actuarial Present Value of Projected Benefit Payments:	Projected benefit payments discounted to reflect the expected effects of the time value (present value) of money and the probabilities of payment.
Actuarial Valuation:	The determination, as of a point in time (the actuarial valuation date), of the service cost, Total Pension Liability, and related actuarial present value of projected benefit payments for pensions performed in conformity with Actuarial Standards of Practice unless otherwise specified by the GASB.
Actuarial Valuation Date:	The date as of which an actuarial valuation is performed.
Actuarially Determined Contribution:	A target or recommended contribution to a defined benefit pension plan for the reporting period, determined in conformity with Actuarial Standards of Practice based on the most recent measurement available when the contribution for the reporting period was adopted.
Ad Hoc Cost-of-Living Adjustments (Ad Hoc COLAs):	Cost-of-living adjustments that require a decision to grant by the authority responsible for making such decisions.
Ad Hoc Postemployment Benefit Changes:	Postemployment benefit changes that require a decision to grant by the authority responsible for making such decisions.
Agent Employer:	An employer whose employees are provided with pensions through an agent multiple-employer defined benefit pension plan.
Agent Multiple-Employer Defined Benefit Pension Plan (Agent Pension Plan):	A multiple-employer defined benefit pension plan in which pension plan assets are pooled for investment purposes but separate accounts are maintained for each individual employer so that each employer's share of the pooled assets is legally available to pay the benefits of only its employees.
Allocated Insurance Contract:	A contract with an insurance company under which related payments to the insurance company are currently used to purchase immediate or deferred annuities for individual employees. Also may be referred to as an annuity contract.
Automatic Cost-of-Living Adjustments (Automatic COLAs):	Cost-of-living adjustments that occur without a requirement for a decision to grant by a responsible authority, including those for which the amounts are determined by reference to a specified experience factor (such as the earnings experience of the pension plan) or to another variable (such as an increase in the consumer price index).

Automatic Postemployment Benefit Changes:	Postemployment benefit changes that occur without a requirement for a decision to grant by a responsible authority, including those for which the amounts are determined by reference to a specified experience factor (such as the earnings experience of the pension plan) or to another variable (such as an increase in the consumer price index).
Closed Period:	A specific number of years that is counted from one date and declines to zero with the passage of time. For example, if the recognition period initially is five years on a closed basis, four years remain after the first year, three years after the second year, and so forth.
Collective Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions:	Deferred outflows of resources and deferred inflows of resources related to pensions arising from certain changes in the collective Net Pension Liability.
Collective Net Pension Liability:	The Net Pension Liability for benefits provided through (1) a cost-sharing pension plan or (2) a single-employer or agent pension plan in circumstances in which there is a special funding situation.
Collective Pension Expense:	Pension expense arising from certain changes in the collective Net Pension Liability.
Contributions:	Additions to a pension Plan Fiduciary Net Position for amounts from employers, non-employer contributing entities (for example, state government contributions to a local government pension plan), or employees. Contributions can result from cash receipts by the pension plan or from recognition by the pension plan of a receivable from one of these sources.
Cost-of-Living Adjustments:	Postemployment benefit changes intended to adjust benefit payments for the effects of inflation.
Cost-Sharing Employer:	An employer whose employees are provided with pensions through a cost-sharing multiple-employer defined benefit pension plan.
Cost-Sharing Multiple-Employer Defined Benefit Pension Plan (Cost-Sharing Pension Plan):	A multiple-employer defined benefit pension plan in which the pension obligations to the employees of more than one employer are pooled and pension plan assets can be used to pay the benefits of the employees of any employer that provides pensions through the pension plan.
Covered-Employee Payroll:	The payroll of employees that are provided with pensions through the pension plan.
Deferred Retirement Option Program (DROP):	A program that permits an employee to elect a calculation of benefit payments based on service credits and salary, as applicable, as of the DROP entry date. The employee continues to provide service to the employer and is paid for that service by the employer after the DROP entry date; however, the pensions that would have been paid to the employee (if the employee had retired and not entered the DROP) are credited to an individual employee account within the defined benefit pension plan until the end of the DROP period.
Defined Benefit Pension Plans:	Pension plans that are used to provide defined benefit pensions.

Defined Benefit Pensions:	Pensions for which the income or other benefits that the employee will receive at or after separation from employment are defined by the benefit terms. The pensions may be stated as a specified dollar amount or as an amount that is calculated based on one or more factors such as age, years of service, and compensation. (A pension that does not meet the criteria of a defined contribution pension is classified as a defined benefit pension for purposes of Statement 68.)
Defined Contribution Pension Plans:	Pension plans that are used to provide defined contribution pensions.
Defined Contribution Pensions:	Pensions having terms that (1) provide an individual account for each employee; (2) define the contributions that an employer is required to make (or the credits that it is required to provide) to an active employee's account for periods in which that employee renders service; and (3) provide that the pensions an employee will receive will depend only on the contributions (or credits) to the employee's account, actual earnings on investments of those contributions (or credits), and the effects of forfeitures of contributions (or credits) made for other employees, as well as pension plan administrative costs, that are allocated to the employee's account.
Discount Rate:	The single rate of return that, when applied to all projected benefit payments, results in an actuarial present value of projected benefit payments equal to the total of the following: 1. The actuarial present value of benefit payments projected to be made in future periods in which (a) the amount of the pension Plan Fiduciary Net Position is projected (under the requirements of Statement 68) to be greater than the benefit payments that are projected to be made in that period and (b) pension plan assets up to that point are expected to be invested using a strategy to achieve the long-term expected rate of return, calculated using the long-term expected rate of return on pension plan investments. 2. The actuarial present value of projected benefit payments not included in (1), calculated using the municipal bond rate.
Entry Age Actuarial Cost Method:	A method under which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings or service of the individual between entry age and assumed exit age(s). The portion of this actuarial present value allocated to a valuation year is called the normal cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future normal costs is called the actuarial accrued liability.
Inactive Employees:	Terminated individuals that have accumulated benefits but are not yet receiving them, and retirees or their beneficiaries currently receiving benefits.
Measurement Period:	The period between the prior and the current measurement dates.
Multiple-Employer Defined Benefit Pension Plan:	A defined benefit pension plan that is used to provide pensions to the employees of more than one employer.
Net Pension Liability (NPL):	The liability of employers and non-employer contributing entities to employees for benefits provided through a defined benefit pension plan.

Non-Employer Contributing Entities:	Entities that make contributions to a pension plan that is used to provide pensions to the employees of other entities. For purposes of Statement 68, employees are not considered non-employer contributing entities.
Other Postemployment Benefits:	All postemployment benefits other than retirement income (such as death benefits, life insurance, disability, and long-term care) that are provided separately from a pension plan, as well as postemployment healthcare benefits, regardless of the manner in which they are provided. Other postemployment benefits do not include termination benefits.
Pension Plans:	Arrangements through which pensions are determined, assets dedicated for pensions are accumulated and managed and benefits are paid as they come due.
Pensions:	Retirement income and, if provided through a pension plan, postemployment benefits other than retirement income (such as death benefits, life insurance, and disability benefits). Pensions do not include postemployment healthcare benefits and termination benefits.
Plan Members:	Individuals that are covered under the terms of a pension plan. Plan members generally include (1) employees in active service (active plan members) and (2) terminated employees who have accumulated benefits but are not yet receiving them and retirees or their beneficiaries currently receiving benefits (inactive plan members).
Postemployment:	The period after employment.
Postemployment Benefit Changes:	Adjustments to the pension of an inactive employee.
Postemployment Healthcare Benefits:	Medical, dental, vision, and other health-related benefits paid subsequent to the termination of employment.
Projected Benefit Payments:	All benefits estimated to be payable through the pension plan to current active and inactive employees as a result of their past service and their expected future service.
Public Employee Retirement System:	A special-purpose government that administers one or more pension plans; also may administer other types of employee benefit plans, including postemployment healthcare plans and deferred compensation plans.
Real Rate of Return:	The rate of return on an investment after adjustment to eliminate inflation.
Service Costs:	The portions of the actuarial present value of projected benefit payments that are attributed to valuation years.
Single Employer:	An employer whose employees are provided with pensions through a single-employer defined benefit pension plan.
Single-Employer Defined Benefit Pension Plan (Single-Employer Pension Plan):	A defined benefit pension plan that is used to provide pensions to employees of only one employer.

Special Funding Situations:	<p>Circumstances in which a non-employer entity is legally responsible for making contributions directly to a pension plan that is used to provide pensions to the employees of another entity or entities and either of the following conditions exists:</p> <ol style="list-style-type: none"> 1. The amount of contributions for which the non-employer entity legally is responsible is not dependent upon one or more events or circumstances unrelated to the pensions. 2. The non-employer entity is the only entity with a legal obligation to make contributions directly to a pension plan.
Termination Benefits:	<p>Inducements offered by employers to active employees to hasten the termination of services, or payments made in consequence of the early termination of services. Termination benefits include early-retirement incentives, severance benefits, and other termination-related benefits.</p>
Total Pension Liability (TPL):	<p>The portion of the actuarial present value of projected benefit payments that is attributed to past periods of employee service in conformity with the requirements of Statement 68.</p>
